---

4 November 2009, Mandriva introduce **Mandriva Linux 2010**, code name **Adelie**, the 25th version of Mandriva Linux.

Included in this new release, “Smart desktop” technology, coming from european research project.

Your desktop is tasks oriented. Organize your personal data (mails, documents, images, videos). Notate it, add your comments and tags. Now your data are easy to find through your projects. This is an exclusivity for Mandriva.

Boot time has been improved again. Mandriva Linux 2010 comes also with a 3 brand new designs: choose the one you prefer. You can also choose one of the 11 extra backgrounds [contributed by community members](#)

Mandriva Linux is the only distribution including both KDE (4.3.2), GNOME (2.28.1) all integrated. Your hardware is a bit old: use light environment LXDE. You are netbook user: check our integration, it's all included in our distribution. Have a look also in Moblin, a new environment dedicated to mobile use.

Your system is easy to administrate. In a few clicks you can:

- migrate your data from Windows
- configure your network connection very easily (ethernet, wifi, 3G...) and manage your network profiles using an all redesigned tool
- security is easy: parental control, interactive personal firewall, security policies tool
- use guest account so that everybody can use your system in a very secure way for your data
- ... and many other functionalities

The best of up to date open source software

- Kernel 2.6.31
- Xserver 1.6.5
- KDE 4.3.2
- GNOME 2.28.1
- Firefox 3.5.3
- OpenOffice.org 3.1.1
