Mandriva Linux 2010 Spring beta 1 available

Rilasciata **Mandriva Linux 2010 Spring beta 1**

{tab=English}

Beta1 is available on public mirrors. For this third devel release you will find Free DVD isos, 32 and 64 bits, and One isos (both GNOME and KDE).

This release is including GNOME 2.30 (released on April 1st) and a preview edition of GNOME-Shell, which will be part of GNOME 3 (which is planned for release on september 2010). Of course, KDE 4.4.2 is also available, as well as various updates for many programs in the distribution.
