

Tellico 2.3.6 for Mandriva Linux 2010.3

Tellico is a KDE-based collection manager for keeping track of your books, bibliographies, videos, music, comic books, video games, coins, stamps, trading cards, wines, board games, or any custom items.

It supports any number of user-defined fields, of several different types: text, paragraph, list, checkbox, year, URL, tables, images, dates, and combinations.

The binaries are built against KDE 4.8.4 (ie the release installed in the MIB-made Mandriva "2010.3"; for using it with previous KDE versions (with KDE \geq 4.4), please grab the srpm file and rebuild it against your KDE.
