

Buuf Deuce KDE 0.9 per Mandriva Linux 2009.1

The Buuf Deuce icon theme for KDE 4

With 764 icons, this icon set is actually more complete than the tangoish theme.

Version 0.9 is a very complete theme, just needs a few tweaks to reach 1.0 status.

It is also the exact opposite of the Tango style: subtle borders, intense details, and a funky style. Also included are a number of Buuf (original) icons to fill in the gaps.
