

KMid2 0.2.0 for Mandriva Linux 2010.0 & 2009.1

KMid2 is a MIDI and Karaoke player for the KDE4 desktop environment.

KMid was developed more than ten years ago, so it was time for a revamping. KMid2 is a rewrite from scratch, with a new architecture and also some new features.

Homepage:

<http://userbase.kde.org/KMid2>

Here are some **major features** implemented in KMid2:

- * MIDI and Karaoke files are supported.
- * Playback to external hardware MIDI devices.
- * Allow to use software synths as well, like Timidity++ and QSynth/FluidSynth.
- * Tempo and volume controls.
- * Added a pitch (transpose) control.
- * Rhythm view (visual metronome).
- * Configurable character encoding, font and color for lyrics.
- * Playlists (song collections).
- * MIDI Mapper, translating General Midi events into other events understood by some synthesizers.
- * Channel window, with solo/muting controls and instrument selectors.
- * Piano player window, using VMPK artwork and technology.
- * Runs in Linux, using the ALSA Sequencer.

obumbrata
et velata
michi quoque niteris;
nunc per ludum
dorsum nudum
fero tui sceleris.
Sors salutis
et virtutis
