

**QDVDAuthor 2.1** for Mandriva Linux 2010.0 & 2009.1

QDVDAuthor, the GUI frontend for dvdauthor and other related tools.

### Homepage:

<http://qdvdauthor.sourceforge.net/>

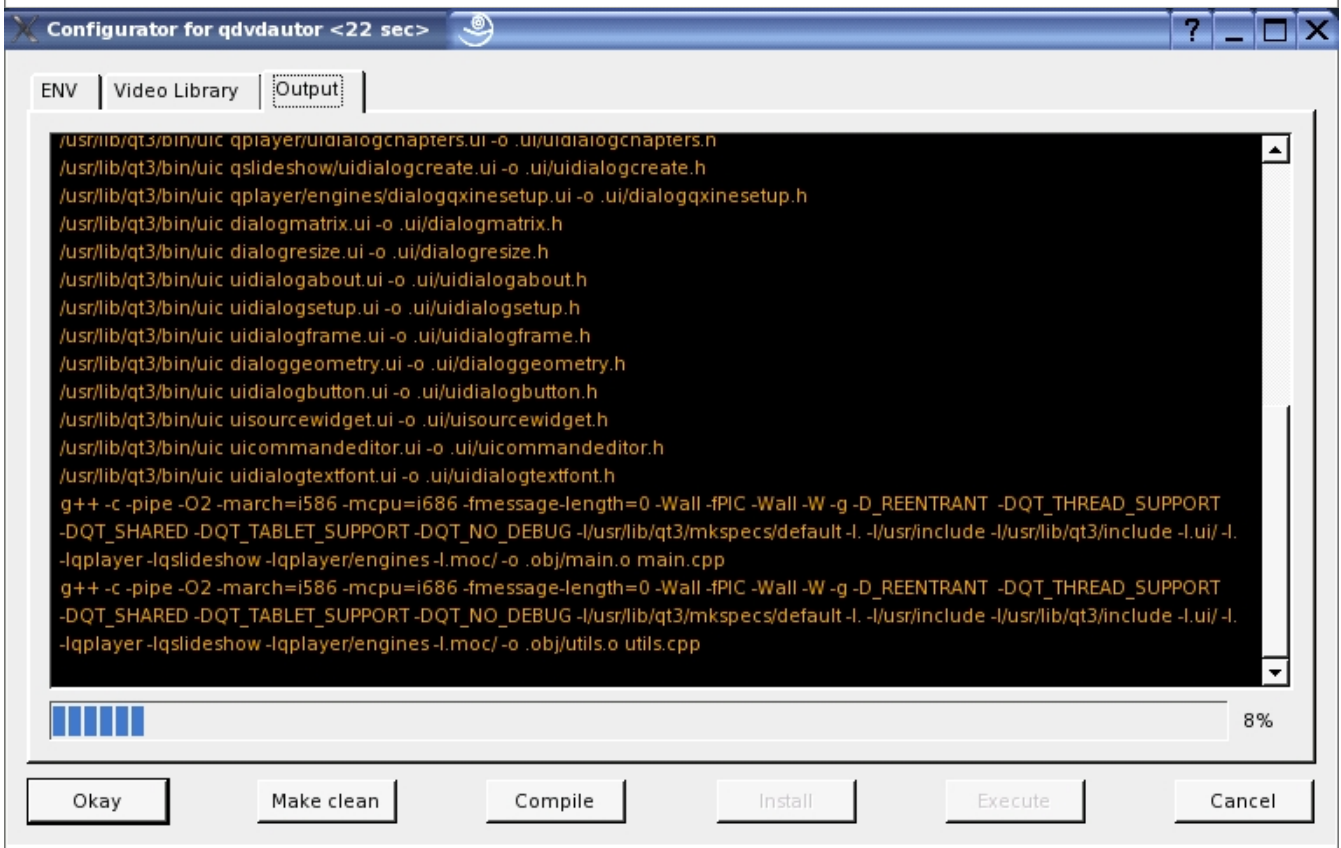

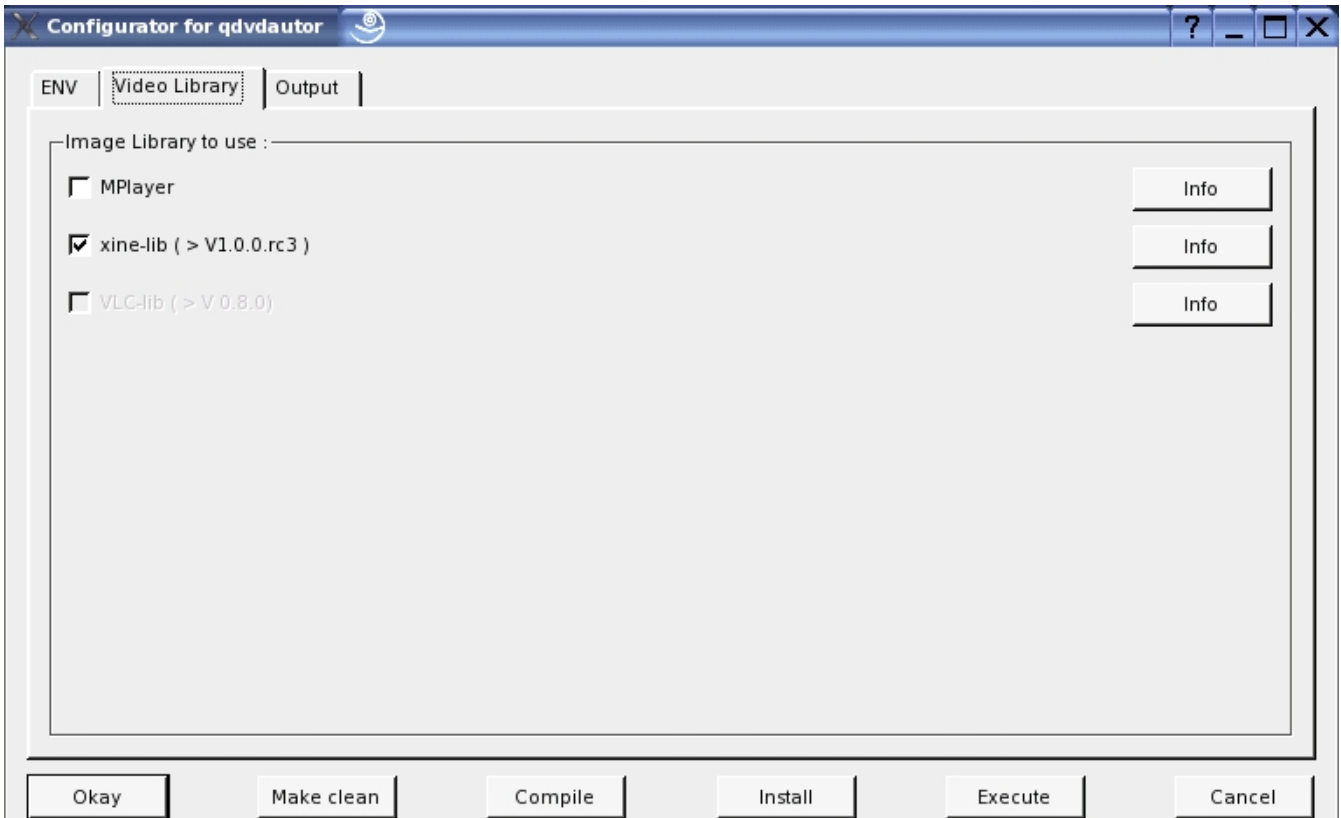

### What is possible so far with qdvdauthor ?

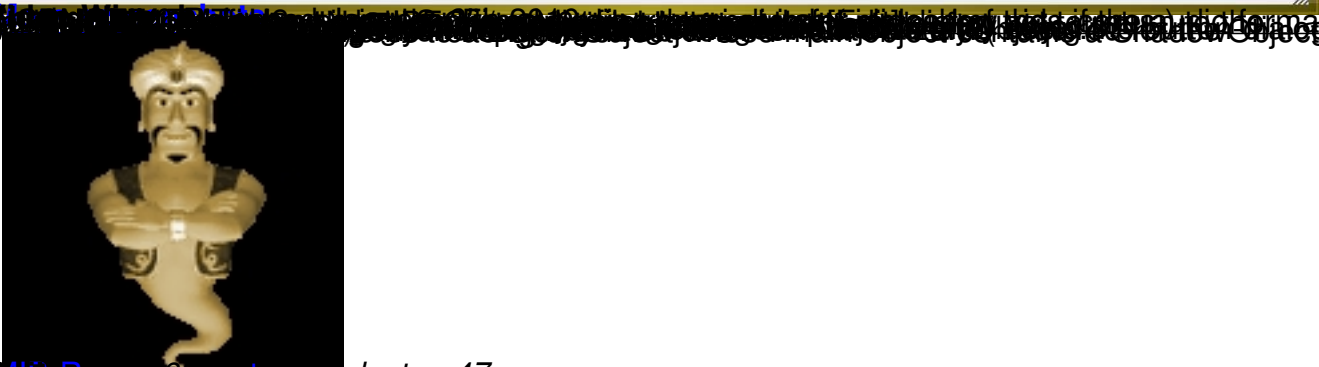

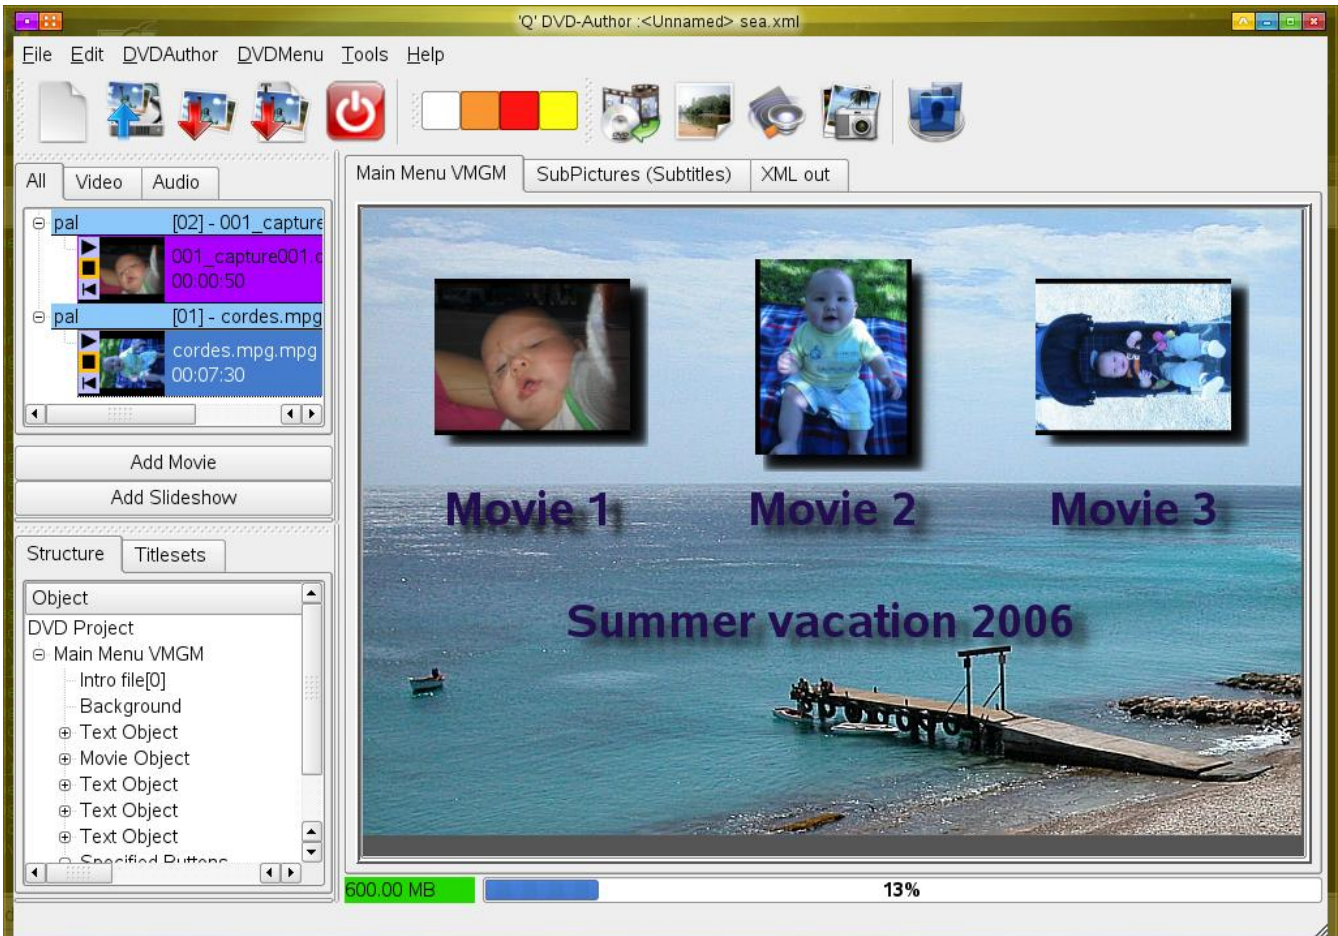

- \* You can use the FewClickWizard to generate a whole DVD with a few mouse clicks.
- \* You can use a simple Template dialog to create your menus.
- \* You can convert the whole project from PAL to NTSC and of course from NTSC to PAL.
- \* You can generate the main menu.
- \* You can generate Sub Menus.
- \* You can create multiple subtitles for your videos.

- \* You can transcode your input videos.
  - \* You can apply multiple audio streams to the input videos.
  - \* You can generate buttons.
  - \* You can scale, color, stretch, twist and shout each object.
  - \* You can give each menu multiple sound tracks.
  - \* You can generate a DVD slideshow.
  - \* You can create a full blown DVD without knowing the command line tools.
  - \* You can modify every generated command before executing and generating the DVD.
  - \* You can create animated menus (moving stuff around).
  - \* You can generate MovieMenus.
  - \* You can generate MovieButtons.
- Note: Animated menus, MovieMenus and MovieButtons REQUIRE mplayer/mencoder !
- \* You can contribute to qdvdauthor.
  - \* And much much more ...

The goal of 'Q' DVD-Author is to provide a complete DVDAuthoring solution for Linux with the emphasis of ease of use and a complete set of functionality.
