

KeePassX 0.4.3 for Mandriva Linux 2010

KeePassX is a port for Linux of Windows password manager Keepass Password Safe
KeePassX è un'applicazione che ci permette di memorizzare tutte le nostre password

Homepage:

<http://www.keepassx.org/>

KeePassX is an application for people with extremely high demands on secure personal data management. It has a light interface, is cross platform and published under the terms of the GNU General Public License.

KeePassX saves many different information e.g. user names, passwords, urls, attachments and comments in one single database. For a better management user-defined titles and icons can be specified for each single entry. Furthermore the entries are sorted in groups, which are customizable as well. The integrated search function allows to search in a single group or the complete database.

KeePassX offers a little utility for secure password generation. The password generator is very customizable, fast and easy to use.

Especially someone who generates passwords frequently will appreciate this feature.

The complete database is always encrypted either with AES (alias Rijndael) or Twofish encryption algorithm using a 256 bit key. Therefore the saved information can be considered as quite safe. KeePassX uses a database format that is compatible with KeePass Password Safe. This makes the use of that application even more favourable.

Una descrizione in italiano del programma da [Linux Freedom for Live](http://linuxfreedomforlive.com) :

KeePassX è un'applicazione che ci permette di memorizzare tutte le nostre password, organizzandole gerarchicamente per categorie e arricchendole con le informazioni associate all'account, come il nome utente, la url del sito su cui siamo registrati, delle note generali... il tutto ovviamente memorizzato in un piccolo database interno, rigorosamente cifrato con un algoritmo a 256 bit!

Keepassx è dotato di una funzione interna di ricerca e di un generatore di password casuali. Tutto il database delle password è criptato e protetto da password o da certificato, basterà quindi ricordare solo la password del database per avere a disposizione tutte le altre.

Screenshots:

The image shows the 'Edit Entry' dialog box in KeePassX. The window has a blue title bar with a key icon, a help icon, and a close icon. The main area is light gray and contains the following fields and controls:

- Group:** A dropdown menu showing 'email' with a colorful icon.
- Icon:** A dropdown menu showing a key icon.
- Title:** An empty text input field.
- Username:** An empty text input field.
- URL:** An empty text input field.
- Password:** A text input field with a '...' button to its right.
- Repeat Password:** A text input field with a 'Gen.' button to its right.
- Quality:** A slider control set to '0 Bit'.
- Comment:** A large empty text area.
- Expires:** Two text input fields containing '28.12.2999' and '00:00:00'.
- Attachment:** A text input field with a folder icon, a document icon, and a close icon to its right.

At the bottom right, there are 'OK' and 'Cancel' buttons.
