

Octave 3.2.0 e Qoctave 0.8.2 per Mandriva Linux 2009.1

GNU Octave is a high-level language, primarily intended for numerical computations.

It provides a convenient command line interface for solving linear and nonlinear problems numerically, and for performing other numerical experiments using a language that is mostly compatible with Matlab. It may also be used as a batch-oriented language.

For more information, see the page [about Octave](#) .
