

FrostWire 4.18.6 for Mandriva Linux 2010.0 & 2009.1

BitTorrent+Gnutella P2P Program

FrostWire è un ottimo programma di filesharing, che usa la rete Gnutella/Gnutella2 (G/G2)

FrostWire is a peer-to-peer file sharing program for the Gnutella and BitTorrent protocols. FrostWire is written in Java, and is a fork of LimeWire, another popular Gnutella client from which it was originally born. Released under the GNU General Public License, FrostWire is free software.

Homepage:

<http://www.frostwire.com/>

Features:

- * Completely Free & Open Source!
- * Faster Download Speeds
- * No Spyware. No Adware. Guaranteed.
- * iTunes™ Compatible!
- * BTIH Magnet Torrent Downloads
- * Friendly Online Chat Rooms
- * Improved BitTorrent Technology
- * Even More Connections
- * New & Improved Skins

Nato da una costola o fork di LimeWire, da cui si differenzia per essere una proposta senza versioni a pagamento, e quindi completamente free in una unica versione completa di tutto.

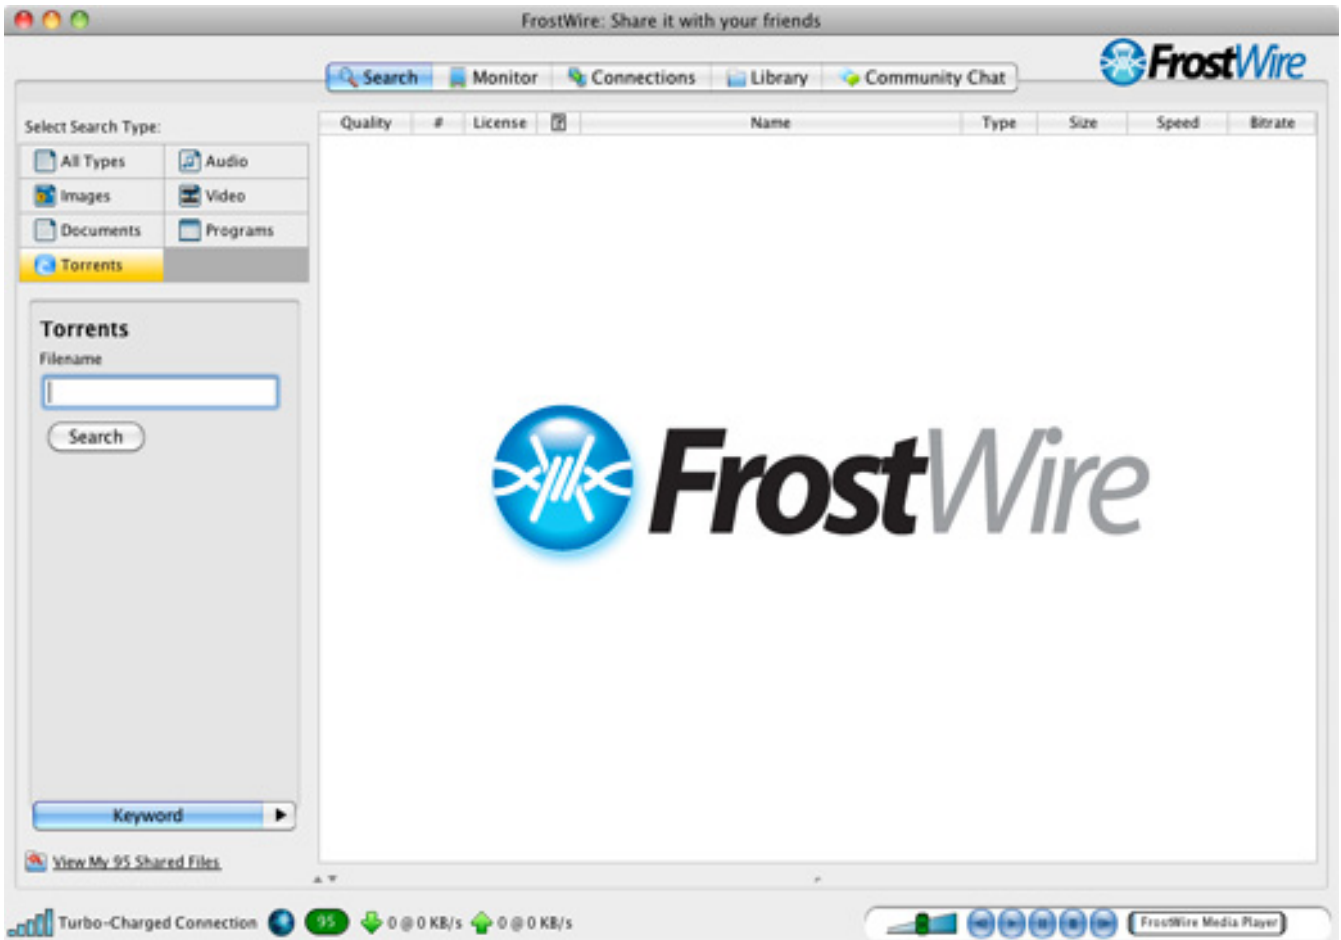

Interfaccia molto completa e ricca di opzioni tra le più svariate, e personalizzabile in tante lingue, tra cui anche l'italiano.

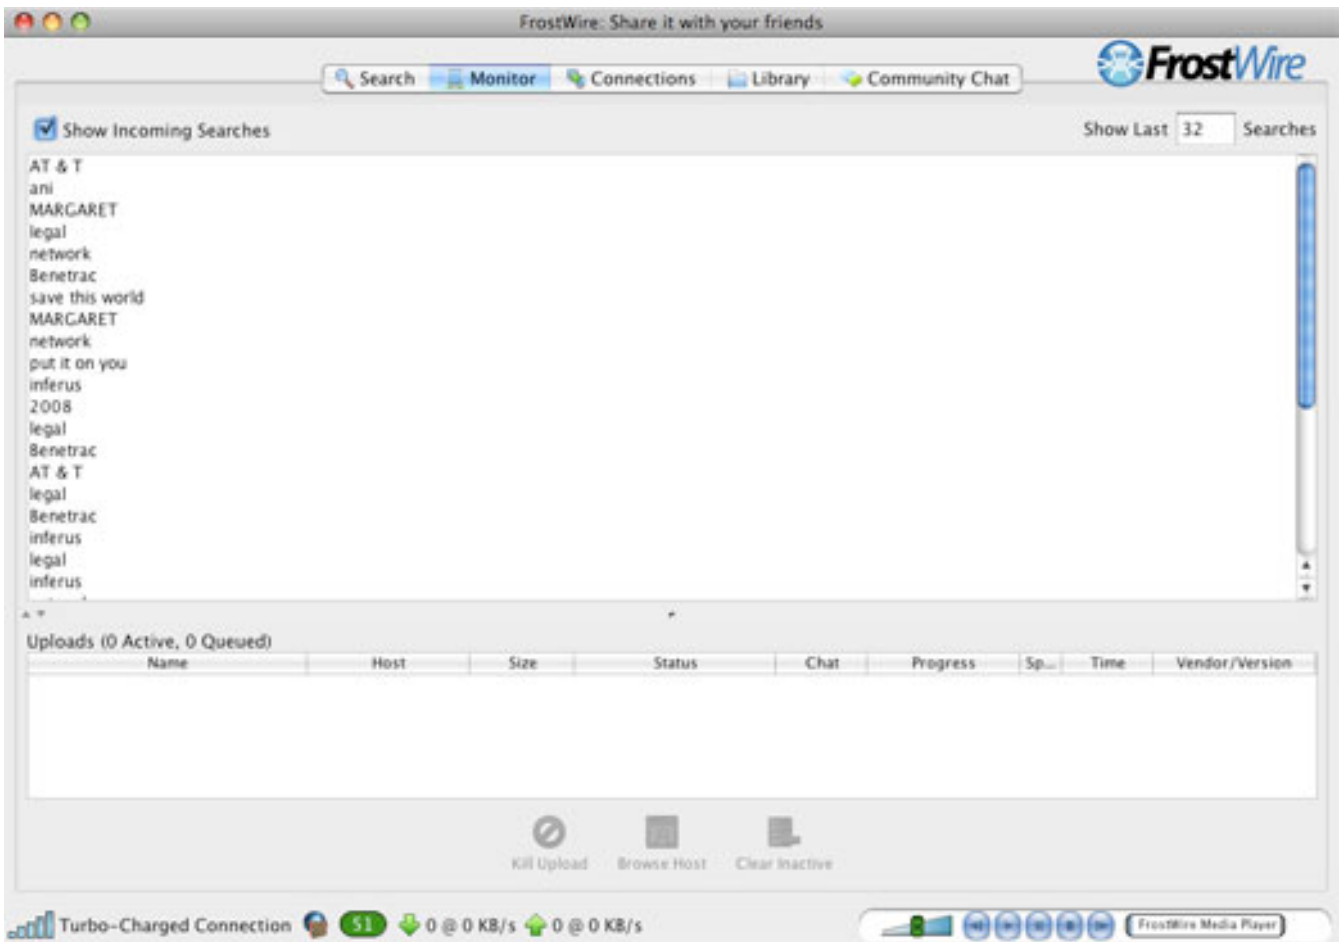

Il programma per il suo buon funzionamento necessita, come il vuze, di Java Sun, preferibilmente ver 1.6.0, configurato correttamente come predefinito con il comando da root:

```
alternatives --config java
```

avendo cura di scegliere il numero giusto che corrisponde al Java Sun.
